

SPRAY PARKS

THE COOLEST THING IN THE PARK!

What is a Spray Park?

A Spray Park is a recreational area designed specifically for interactive water play. Unlike swimming, wading, or paddling pools, aquatic playgrounds have no standing water. Spray Parks improve public space and provide an ideal setting for family recreation.

Why install a Spray Park?

A community contemplating the addition of a recreational facility should consider a spray park. Children have a natural affinity for water and Water Odyssey spray parks provide them with a wholesome interactive play environment.

Spray Parks:

- ◆ Can be an option to a swimming, wading, or paddling pool
- ◆ Cost less to install than a swimming, wading, or paddling pool
- ◆ Cost less to maintain than a swimming, wading, or paddling pool
- ◆ Are safer since there is no standing water
- ◆ There is no need for Life Guards
- ◆ Are an ideal community recreational attraction
- ◆ Provide stimulating interactive aquatic play
- ◆ Stimulate children's senses
- ◆ Are programmable to enhance the play experience
- ◆ Are "kid friendly"
